

## The Company

Grauch Enterprises is a privately owned small business manufacturing products for both government and commercial entities. They have made a commitment to invest in themselves, their customers, employees, and the community by:

- Supplying products that are unsurpassed in quality in a timely manner at competitive prices.
- Always serving their customers in a professional and courteous manner, and being committed to meeting the customers needs and exceeding their expectations.
- Adhering to an ethical code of integrity and honesty in their business relationships.
- Providing a rewarding, safe, and stable work environment for their employees, and creating employment opportunities through sustained growth.

## The Solution

To remain competitive, Grauch Ent. has been able to gain a leading edge on their competition with the use of FeatureCAM and its feature based programming. FeatureCAM has allowed them to reduce programming time considerably, and thus continues to give Grauch Ent. the extra push to keep ahead in today's manufacturing market.

**“The ease of CAD in FeatureCAM and the Tech Support/Training from TriMech has made complex parts a simple reality”.**
