

The Company

Established in 1978, Master Machine & Tool Co. of Newport News, VA has become a major leader in the manufacturing market. With capabilities such as CNC Machining, welding, fabrication, grinding and inspection; Master Machine has been a faithful supplier to numerous companies including the U.S. Government and its military branches.

Master Machine continues to bring quality and reliability to those around VA and the continental US. Master Machine is also a proud sponsor of auto racing, and for the last twenty years has manufactured parts for the NHRA.

The Solution

To remain competitive, Master Machine has been able to gain a leading edge on their competition with the use of FeatureCAM and its feature based programming. FeatureCAM has allowed them to reduce programming time considerably, and thus continues to give Master Machine the extra push to keep ahead in today's manufacturing market.

“FeatureCAM reduced our programming time for 3D mold work from 8 plus hours to two hours or less. Our basic programming time, turning and milling, has also been greatly minimized. FeatureCAM has allowed us the ability to increase our overall production.”
