

The Company

RMJ Machine Technologies, Inc is a CNC Precision Machine Shop located in Lynchburg, VA. The company was founded in the year 2000 with the motto of “Customized Machining to fit YOUR needs”. They specialize in meet the requests of their customers with quality parts in a timely manner.

RMJ has steadily grown over the past ten years in customer base as well as volume. They pride themselves on getting the job done right the first time so they can keep their customers happy. Whether the job is large or small, RMJ is equipped to produce the products needed.

The Solution

To remain competitive, RMJ Machine has been able to gain a leading edge on their competition with the use of FeatureCAM and its feature based programming. FeatureCAM has allowed them to reduce programming time considerably, and thus continues to give RMJ the extra push to keep ahead in today’s manufacturing market.

“When I was looking to get software to do our programming I was looking for something that was reliable and user friendly. After testing several different cad/cam packages I felt like FeatureCAM was the way to go. That has turned out to be a great decision. FeatureCAM is definitely user friendly and if you do run into a problem their tech support is awesome.”
