

## The Company

Toner Machining Technologies (TMT) provides complete turnkey solutions, designs and builds work holding fixtures, special machines, and gages for many Fortune 100 Companies located across the United States and around the world.

TMT's founder, Jim Toner, said: "In just three short years we have risen to the top of our field by offering the best quality and service in the industry and by always meeting or exceeding our customers demands and requirements of us." The company has been named by Entrepreneur Magazine and Dun & Bradstreet as one of the "Top 100 Fastest Growing Companies in America" for the second year in a row.

## The Solution

Using FeatureCAM and it's 3D capabilities Toner Machining Technologies (TMT) has been able to product a new product called a TMT Wallet. TMT Wallets are designed and built to outlast traditional leather or nylon wallets by many years. Everyday they are tested in extreme conditions all over the world by people in the military, law enforcement and sportsman alike.

**“FeatureCAM helps us to remain competitive, and the learning curve is remarkable compared to other products. Choosing FeatureCAM was a wise decision.”**
